Ultimate-Performance TP9C Furnace

ClimateCare's modulating TP9C Gas Furnace is ready to keep you and your home comfortable by varying the heating capacity and air flow continuously and precisely to match your family's comfort level.

- **Modulating Technology**
The TP9C's unique modulating technology can vary the heat capacity in 100 increments from 35% to 100% resulting in precise temperature control.
- **ECM Motor Technology**
ECM technology offers continuous gradual fan speed changes. The result is incredible humidity control, reduced sound levels and one of the best energy efficient furnaces available.
- **CustomTrak Technology**
ClimateCare modulating furnaces incorporate CustomTrak technology in every model. When paired with a ClimateCare Air Conditioner or Heat Pump, the furnace settings can be customized for any special climatic conditions. Your ClimateCare professional can program the operating cycle that works best for you to maximize your indoor comfort.

Peace-Of-Mind Warranties

Lifetime Heat Exchanger Warranty • Standard Five-Year Parts Warranty, upgraded to a 10-year Total Parts Warranty, if registered online within 90 days of purchase • Also includes a Five-Year Complete Assurance Warranty. If the Heat Exchanger assembly (primary and/or secondary) fails due to a covered defect in the first 5 years after installation, ClimateCare will provide a replacement model, or if an exact replacement model is not available, an equivalent unit will be provided to the original purchaser. Refer to product warranty for full details.

Model TP9C is verified to meet ENERGY STAR® requirements.
